## TMS Software That Works the Way You Do

**Stability. Innovation. Experience.** In an industry crowded with questionable startups and faceless giants, CSA Software stands apart. For over 40 years, we have been reliable TMS innovators for freight forwarders and logistics professionals across the globe, putting customers' relationships first, and delivering intuitive scalable solutions built by the people who understand freight, for the people who move freight.

**High-tech solutions. High-touch relationships.** We deliver the digital infrastructure that allows your business to thrive.

**CSA Software scales with you.** No matter your current size or capacity, we're with you tomorrow.

**US-Based.** Headquartered in Livonia, Michigan, our development, support, and sales teams are easy to reach.

**Expert led customization.** We work with you for the long haul to build, deploy and scale the software for **your** unique needs.

**100% Web-Based solutions.** Hosted your way: On-premise, SaaS, or private cloud.

Learn how CSA Software's innovative TMS solutions can help your operation.

### World-Trak TMS

The heart of your operation. A powerful, centralized hub for managing every detail of your end-to-end air cargo operation.

### Web-Trak Portal

Empower your customers and partners. Give them 24/7 visibility and freedom to manage and track shipments in real-time, independently.

### Dispatch-Trak

All assisted dispatch management for forwarders, cartage agents, linehaul carriers, and over-the-road truckers. Assign, dispatch, and monitor trucks and drivers in a dynamic cargo environment.

### LTL-Trak

A comprehensive solution for comparing carrier rates, utilizing rate engines, and managing less-than-truckload shipments efficiently.

### Account-Trak

A complete, cloud-based accounting system designed specifically to integrate seamlessly with your World-Trak TMS.

### EDI-Trak

A dedicated connectivity solution providing the robust EDI capabilities your partners demand without the need for third-party outsourcing.

### API-Trak

Easily integrate with external systems and connect with major carriers for real-time tendering and status updates.

Ready to gain complete visibility and control over every detail in your cargo operation?
