

# Dispatch-Trak

## Take Control of Your Air Cargo Trucking Operation!

# DISPATCH

  

---

trak

The industry leader in air cargo TMS software now introduces **Dispatch-Trak**—a powerful, cloud-based dispatch solution built directly into the **World-Trak** air cargo TMS platform. **World-Trak** powers the industry's leading freight forwarders and 3PLs, and now combined with **Dispatch-Trak**, gives you unmatched support and control in Air Freight Trucking. We're proud of our proven track record successfully supporting your customers, and now we're proud to be there for you, too.

### Intelligent. Powerful. Intuitive. Built for Air Cargo.

#### Complete Operational Control

- Manage every element of your trucking operation natively inside the industry's most comprehensive Air Cargo TMS.
- Ideal for **local cartage, linehaul, and over-the-road** trucking operations.
- Easily expand into additional business models including **Linehaul, Truckload, and 3PL**.

#### Real-Time Driver & Fleet Visibility

- Track, monitor, and connect with drivers in real time using the integrated **Driver-Trak** mobile app.
- High-visibility **map displays**.
- **Route planning, optimization, visualization, and execution.**
- Seamless connectivity with industry partners.

#### Accounting & Integrations

- Simplified accounting with **CSA's Account-Trak**.
- Seamless integration with **QuickBooks** and other enterprise accounting systems.

#### Flexible Platform

- Fully cloud-based and accessible on all your devices — anywhere you go.

Learn how CSA Software's innovative TMS solutions can help your operation.

### Technology Designed for Trucking

**Cutting-edge AI & automation** deliver intelligent, real-time routing and dispatch.

**Drag-and-drop route building** minimizes planning time and helps prevent issues before they arise.

**Instant visibility** with live maps of drivers, routes, and projected delivery windows.

**Custom dispatch dashboards** tailored to your workflows.

**Exception management tools** that highlight issues and focus attention where it's needed most.

**Industry integrations** including Samsara, FreightSnap, and more.

**Native EDI & API connectivity** with no EDI transaction fees and simple customer API connections.

**Extensive auto-rating engine** for faster, more accurate billing.

**Driver settlement system** to streamline payments and reconciliation.
